

Training: GHG measurement and management

A capacity building program will be held to address overall management and measurement of GHG emissions across Scope 1, 2 and 3. The training will consist of interactive sessions on boundary setting, identification and scope of emission factors, information on GHG reporting platforms, mitigation strategies for emission reduction and how to strengthen/ widening Scope 3 accounting.

The training faculty will be from all partner organizations viz., WRI India, CII and TERI with the curriculum based on the GHG Protocol Corporate Standard.

Programme promoters

- WRI India
- The Energy & Resources Institute
- Confederation of Indian Industry

Hosted by:

- Industrial Waste Management Association, Chennai

Objectives:

- Learning the concepts of Climate change
